(a) Rate per 1,000 of mean population.

(b) Population estimates for periods subsequent to the Census of 30th June, 1961, represent the population ascertained at the census plus natural increase and recorded net migration since that date. As complete records of interstate migration are not available the estimated population since 30th June, 1961, is approximate.

(c) Includes natural increase and net migration. See also note (b).

(d) Hobart and Suburbs.

(e) Equivalent annual rates.

(a) Up to and including 1958 average rainfall for each year (represented by 100) is the average over the period 1911–1942. As from 1st January, 1959 a long period average from a selection of representative stations is used.

SEASONAL CONDITIONS, TASMANIA: JANUARY, 1965

Rainfall: Generally rainfall for the month was above normal. However in the northern half of the State only the North-East corner and a small area near St. Marys recorded better than normal falls. A large part of the agricultural area from the Tamar Valley to Smithton and inland as far as the Hampshire Hills recorded falls of more than 50 per cent below normal. Some areas around Burnie, Wynyard, Latrobe and Tagarra recorded less than 30 per cent of normal falls.

The Southern half of the State recorded some heavy falls ranging from normal to 260 per cent of normal. Falls in the area Tunnack-Oatlands-Interlaken were the best on record for ten years. Surrounding this area rainfall totals were near 150 per cent of normal.

Heaviest actual falls were again concentrated in the Western Highlands, where totals ranged from six inches to a State maximum of 1,115 points at Lake Margaret.

Temperature: In all parts of the State, readings during the month were the lowest for many years, with new low figures established in many centres, particularly on the East Coast, where all areas recorded the lowest mean maximum readings on record.

The highest temperature for the month was recorded at New Norfolk on 17th January (101°) and the lowest at Bothwell and Mt. Wellington on 7th January (27°).

Rural Conditions: Crops and pastures in the south were greatly benefited by the heavy rainfalls; however, hay cutting was disrupted and in some cases partial or total loss was reported.
